

Programma	Sotto Programma	Anno	Master	Corsista/i	Titolo Progetto	Abstract
CIP	Turismo	2011	XXX	De Blasi	EDEN	In order to help decongestion, to give visibility to emerging European tourist destination, to attract visitors in non traditional area, this project aims to establish a significant activities range oriented to the creation of a launch scheme for new tourist destinations. The outcome will be the development of thematic tourism product and an important economic income for all the stakeholders. Moreover a communication strategy will be developed to assure the dissemination of the results of the project
Cooperation	AlpinSpace	2011	XXXI	Michieletti Pasqualin	M2M - Macugnaga to Me	M2M project aims to give to Macugnaga's inhabitants and tourists the possibility to access to Internet at any moment and place. The purpose is to ensure availability of ICT infrastructure and related services where the market fails to provide it at an affordable cost and to an adequate level to support the required services, especially in remote mountain areas. M2M pursues the uptake of ICTs by all Macugnaga's inhabitants and the development through balanced support for the supply and demand of ICT products and both public and private services. This project pertains to priority 2, to improve accessibility to services and connectivity within the Alpine Space. In fact these new multimodal solutions and the access to ICT connections are clearly transnational tasks and have performed a shift from single to network solutions, giving special attention to needs and demands of mountain areas, in order to achieve common benefits for the Alpine Space as a whole.

Cooperation	Central	2011	XXX	Cataudo Panariello	Gate to Europe	<p>The project aims to spread the culture of European funds in areas and regions from where, for lack of skills and technical knowledge, the applications sent in order to take part of European calls for funds are few. By this project we want to impact the brain drain effect and the job market. The project area on which the project wants to emphasize is the area of innovation. So the General objectives are:</p> <ul style="list-style-type: none"> <li>1)to spread an european funds' management culture; 2)to impact on job markets of the countries involved.</li> <li>3)to improve higher education and to up-skill the workforce across Central Europe, and build better links between training providers and industry to ensure that the skills they teach match those that companies need, today and in the future.</li> </ul> <p>The specific objectives are:</p> <ul style="list-style-type: none"> <li>1)to get the basis for the construction of a training pilot project implemented by local public bodies internal human resources;</li> <li>2)to create a stable network among the partners, in particular among the public bodies in order to give them other further opportunities to collaborate;</li> <li>3)to test a training model which could be implemented in other countries.</li> </ul> <p>The need of the transnational partnership is (...)</p>

Cooperation	Italia - Slovenia	2011	XXX	Belfiore	TREzze e CORalligeno dell'ALto Adriatico: valorizzazione e gestione sostenibile nel Golfo di Trieste	Lo scopo del progetto TRECORALA è quello di ampliare le conoscenze biologiche sulle trezze e sui fondali a coralligeno del Golfo di Trieste e di individuare linee guida per la gestione, tutela e valorizzazione di tale patrimonio naturale rafforzando l'attrattività e la competitività dell'area e contribuendo alla salvaguardia della biodiversità. Attraverso informazioni sullo sfruttamento alieutico verranno effettuate proposte gestionali riguardanti alcune risorse di particolare interesse commerciale. I risultati verranno diffusi effettuando appositi seminari informativi, rivolti alle diverse figure coinvolte nella gestione della pesca e nell'usufrutto turistico dei siti di interesse. Come prodotto finale il progetto si propone di fornire gli strumenti necessari per la gestione transfrontaliera congiunta delle aree marine sviluppando anche il comparto turistico.
Cooperation	IV C	2008		Capuis	COaSTal Atlas NETwork	This project aims at the development and application of a methodology for the implementation of local or regional Environmental Atlases. Environmental Atlases are systems which allow easy access to environmental spatial data through the web; they allow the visualisation, the overlapping and, where foreseen, the download of thematic maps related to environmental issues (e.g. habitat, biodiversity, climate, pollution, plans and project affecting Natura 2000 sites, etc.). More specifically, the Environmental Atlases foreseen by this project: - provide easy access to environmental data produced by local and regional authorities, regional agencies and other data providers - are part of a network aimed at sharing experience and data across Europe and demonstrating the tool's potential - allow free overlapping of a variety of environmental thematic maps for cross-analysis (...)
Cooperation	SEE	2009		Gallagio Calderan Galessio	SatelliteTechnologies for Land	On the basis of one Italian region best practice, tested and successfully implemented over seven years so far, the project aims to adopt a common protocol for the identification and management of uncontrolled waste disposal sites to be used by PAs in their institutional role of controllers. In the context of waste disposal sites, because of the risk of water resources and soil contamination, PAs are in charge of identifying sites (both known and unknown) that pose contamination risks. The SATLAND project aims at developing a protocol that provides a set of good practice rules for the determination of priority lists for further on-site intervention based on several factors incorporating contamination risk, site accessibility, economical variables, etc. Furthermore, the initiative envisages some pilot initiatives to rehabilitate uncontrolled landfills.

Cooperation	SEE	2011	XXX	Napolitano	Nautilus. J. Verne	<p>Il Mediterraneo è stato per millenni via di comunicazione privilegiata per i popoli che vivevano sulle sue sponde. Questo passaggio ha lasciato numerose tracce nei fondali delle aree interessate dalle antiche rotte commerciali, e resti di strutture dove esistevano approdi, porti o abitati prossimi alla costa. Questo potenziale permette di proporre la valorizzazione culturale come punto di forza per lo sviluppo del territorio finalizzato ad una sua riqualificazione economica. Il progetto intende mettere a punto e applicare metodologie e tecnologie di ricerca/conoscenza e valorizzazione/comunicazione di siti archeologici subacquei complessi e pluristratificati. L'obiettivo è la trasformazione del sito in parchi archeologici subacquei, attraverso metodologie e tecniche innovative e sperimentali, al fine di garantire una positiva ricaduta economica derivante dalla promozione turistico-culturale del background di riferimento.</p>
Cooperation	SEE	2011	XXXII	Braghetto - De Giorgi	Model "And" Prevention "of" Risks" for "Evaluating" the Level "of" Impact "of" Exceptional" Flood"	<p>The local specific causes of floods can also be different, varying from insufficient channel capacity to levee failure to debris flow obstruction. The definition of standard shared criteria for the identification, evaluation and representation of the main kinds of floods and related causes represents the fundamental for any activity finalized to flood prevention and preparedness, and should be reachable through wide collaboration between public authorities and all the concerned stakeholders, also involving experts from scientific institutions in the fields of hydrology, hydraulics and geology. For these reasons, the project aims at the identification of a set of significative pilot studies for the involved Countries, basing on threats and priorities; for each pilot case the specific flood causes and associated risks will be assessed, and the relevant data will be collected. The project will produce also shared guidelines of procedures for data collection, standardization and harmonization and the creation of a library of existing data concerning floods and related risks. Mathematical modelling of floods will be used for disaster prevention and development of emergency response plans, through the simulation of (...)</p>

Creative Europe	Cultura 2000	2003		Carrusci	MEIGAMA SUSTAINING EUROPEAN MUSICODIVERSITY	<p>This project brings together six organisations, each a pioneer and benchmark for excellence in its discipline. Specialist knowledge and leadership supporting local classical musics is provided by the voluntary organisations most active sustaining Scottish pibroch, Irish harp and Sardinian launeddas traditions. Innovation and experience developing e-learning resources are brought by our commercial partner, Scoiltrad Teo.</p> <p>While these musics have been heard across Europe for 500 years, 900 years, and 3,000 years respectively, they are now at a critical point. Continuing lack of education and patronage within the fabric of state institutions has yielded insufficient regeneration. All three traditions risk being submerged by the more invasive, global species of music taught in our schools and patronised by millions. Our common problem is that musical creativity on Highland bagpipe, Celtic harp or launeddas now stems from the keyboard-based, trans-national tradition, rather than the indigenous heritage so expansive and rich for these instruments. The result is accelerating dilution of three of Europe's most distinctive musical cultures, to the point where they are dissolving, increasingly homogenised. Cultural forces encourage our artists to speak the (...)</p>

Creative Europe	Cultura 2007	2010	XXIX	Brunelli	CHIMERA - Cultural Highways for Integration through Music to spread European Roots between Adolescents	<p>CHIMERA aims at creating a way of intercultural dialogue through singing. The priority of this social and artistic interaction consists in promoting common European values as integration, harmony and peace among youths. Music represents the project's thread, being the best international language for overcoming verbal barriers and communicating emotions. Priority target of this cooperation are youths with a common interest in musical culture. Choirs and singing schools participate by offering qualified teachers and educators. 'Cultural Highways' will be designed through initiatives of pupils exchange in order to inject values as friendship and brotherhood into the youngest European citizens while strengthening their European consciousness.</p> <p>Training sessions shall accompany pupils towards human development, both moral and social. For this reason one of the foreseen results is the creation of a 'European School of Singing', which will provide to ensure a sound cooperation even after the end of the project, spreading good practices exchange and innovative teaching approaches to new subjects besides the partnership currently involved.</p> <p>European School of Singing will take place in a parallel and simultaneous path across the European centers involved; methods will be investigated by teachers during workshops to be held in the participating Countries and then transferred to pupils during specific training lessons, where methods will be applied to topics / repertoires expression of local and European cultural heritage.</p> <p>The different groups will pay particular attention to study deeply local and regional cultures, proposing an educational and constructive dialogue between people. this will be achieved in particular through Youth Exchanges that will involve all the participating Choirs. At the end singers will perform as 'The European Youth Choir' in a concert tour in Europe.</p>

Creative Europe	Cultura 2007	2012	XXXIV	Guadalupi	EuroCOM	<p>The COMIC project involves five European art schools and universities - so both academic and non-academic institutions - and one museum, having comics and illustration as its medium and European citizenship as its subject matter.</p> <p>In fact, the five institutions, located in Bologna, Paris, Hamburg, Madrid and Athens, will organise autonomously lectures based on EU's history and evolution and then give to the students and assignment that will let them conceive a comic artwork which will express their peculiar view on what it means to be a European citizen. Then in each institution internal commissions made of professors will select the top 10 works, that will be printed and exposed first in their exhibition spaces, then moved to all the other partners' spaces.</p> <p>Finally, all the works made by the 50 European students will be exposed in the spaces of the Belgian Comic Strip Center, in Brussels [...]</p>
Creative Europe	Cultura 2007	2012	XXXIV	Montanaro	LaceinU	<p>Starting from the consideration that today many people think that lace-making art is only a cultural heritage put away in museums, regarded only as a past tradition, the LACEinU project proposes to present and to value lace-making art in an European key by a traditional and at the same time innovative methodology in the certainty that this art has accompanied many past generations' life and it's still present and important for us. LACEinU puts together four partners from Italy, Spain, Belgium and Slovenia that are involved in the fields of culture and lace teaching.</p> <p>The project aims to stimulate intercultural dialogue and trans-national mobility of artists and works; and to create a 'model to follow' for other European cultural actors.</p> <p>The main activities and outcomes are:</p> <ul style="list-style-type: none"> <li>-itinerant lace exhibition that lets to know and to appreciate European lace-making art;</li> <li>-organization of lace-making courses, to allow a large number of people to approach lace in an active way;</li> <li>-organization of four different workshops with young artists from the partners' countries, [...]</li> </ul>

EACEA	Cittadinanza	2009	XXVIII	Fregolent	Volpago for Integration in the European Week	<p>The general objective of the project is to bring Europe closer to the citizens of Volpago and Bree in order for them to feel they are actively participating in the building of a united Europe. In order for this to occur the project plans to intervene in four areas:</p> <ul style="list-style-type: none"> <li>-in strengthening the commitment of the citizens towards European integration. From this specific objective the following results are expected: the citizens will have the opportunity to reflect on the basic ideas of the European Union and make them real, the families will have the opportunity to improve communication with families from another European country, schools will have the opportunity to increase their awareness of Europe as a union.</li> <li>-in the active involvement of the local community. From this specific objective the following results are expected: ample participation on the part of the families and citizens in the organization of the twinning, ample participation of families and citizens during the European Week from August 12 to 16, active participation from the schools and active participation from volunteer associations.</li> <li>-in creating an exchange with elementary and middle school children. From this specific objective the following results are expected: creation and deepening the awareness of the daily life of children from another European country, developing new ways of interaction between children who live in a different cultural context.</li> <li>-in creating an exchange of experiences for developing sustainability. From this specific objective the following results are expected: emphasizing and enhancing the value of typical local products.</li> </ul>
EACEA	Cittadinanza	2011	XXX	Yscollari	Dalla conservazione alla trasmissione della memoria	<p>La memoria storica dell'Olocausto fa parte del nostro passato europeo, a cui non appartiene solo il ricordo delle violenze, delle guerre, degli stermini legati principalmente agli eventi della seconda guerra mondiale. E' una memoria che, come tutte le altre memorie, ha bisogno, per essere attivata e poter essere influente, di un'azione di formazione, divulgazione e di promozione da parte di tutti i soggetti interessati come; scuole, università, istituti culturali, associazioni, e delle autorità politiche.</p> <p>La tematica del Olocausto che sarà al centro del progetto favorirà un ampio dialogo intergenerazionale tra i cittadini europei di diverse fasce di età: partendo dalle tragiche conseguenze del nazismo, verrà gradualmente stimolata un'ampia riflessione storica ed etica tra le generazioni, le quali, nel nome della comune condivisione dei valori universali democratici ed umani, saranno in grado di superare le differenze d'età in un processo circolare, attraverso il quale i più anziani</p>

EACEA	Cittadinanza	2012	XXXIII	Mana	ELIXIR..of long life (with culture, sport and solidarity)	The aim of Project ELIXIR is to involve society (associations, local authorities and citizens) in the creation of a network between the associations and the towns of the various partner countries, in order to allow the exchange of possible ways to raise awareness among the elderly to preserving an "inner youth" (physical, psychological and cultural improvement), securing a life of dignity and independence (art. 25 of the Charter of Fundamental Rights of the European Union), and in order to open a permanent table of discussion and elaboration of proposals to Europe in such area of interest. ELIXIR thus intends to create a space of dialogue with a European vision and to define common lines of action to handle communication and active participation of the citizens. Such goal can be reached through the exchange between the associations regarding procedures of work, involvement of the elderly and promotion of the activities, and through the stakeholders' knowledge of the role of Europe in this field [...]
EACEA	Cittadinanza	2012	XXXIV	Pison - Salvador	Sharing my skills	Our idea is to bring two groups of people together from each country, 1 group over 60 years and the other younger than 60, though over 18 years old. 60 + participants are a resource because they are the link from the past to the future of Europe. We hope that participants 60 + will consider this experience as an opportunity to be included despite of the age, active actors as carriers of actual values but matured in the past. Their memory will teach the youngers to use hands and head to valorize ancient works, works of craftsmen both feminine and masculine one. We hope that 18 + will consider this experience as a true life project, to find new ideas and sprouts for new professions, linked to the territory, using its bearable resources. On the other hand the over 18 will teach new technologies and today's communicative techniques with the double aim to include 60 + in the European society and use them to the services of the ancient abilities. So we have chosen "Sharing my sk" as the title of the project which wants to make to live sharing experiences, overcoming tied up gap to the age, to the sex, to the religion, to the social condition The project will also be realized through [...]

EACEA	E-Content	2008		Di Falco	Internet european DemoEthnoAnthropology library	<p>IDEA project wants to develop a network which links various EthnoAnthropology Centres on the Web, giving more prominence to their activities and putting them in a wider international context. It will contribute to improve conditions for accessing, using, reusing and exploiting digital DemoEthnoAnthropology content, for encouraging co-operation between European scientific and cultural institutions, thus helping to improve the interoperability between different networks, organized in common semantic system, across types of cultural organisation of oral tradition and collection of ethnography finds of European countries partners. The use of a common legacy system for describing cultural and scientific resources in the object multimedia repository of the European DemoEthnoAnthropology Library will utilize for pulling down existing barriers that block accessibility of data resources, making it particularly hard the exploitation of the digital content potential. The Project IDEA will facilitate the establishment of comprehensive geo-referential object (alias ethno-finds) in multimedia repository, connecting European countries of the Project in specific anthropology sector, by supporting</p>
EACEA	E-Learning	2001		Perazzi	e-LIT: Learning Innovation Tools	<p>Il progetto si configura come azione di ricerca applicata, sviluppo, applicazione e verifica di nuovi ambiti d'apprendimento, attraverso la combinazione di metodi educativi innovativi, risorse digitali e la tecnologia della comunicazione, utilizzati da scuole e centri di formazione nel campo della formazione continua degli adulti ed in particolare degli occupati nelle PMI dove l'e-learning potrà essere praticato in modo più esteso ed efficace, se sapientemente combinato con metodologie didattiche realizzabili solo attraverso il rapporto diretto con formatori, tutors e colleghi (es.: stages, work experiences, role playing etc.)</p>
EACEA	Erasmus Mundus	2009	XXVIII	Spiga Meloni Zoccheddu	EUROPE and AFRICA SUPPORT YOUNGS	<p>Questo Progetto nasce da una duplice esigenza: da una parte, standardizzare le funzioni del personale coinvolto in un sistema e-learning dalla ideazione fino alla realizzazione pratica; dall'altra, si riscontra la necessità di colmare il gap promozionale dell'offerta formativa delle entità operanti in Europa. Si riscontra inoltre la necessità di valorizzare la prerogativa principale del sistema della formazione a distanza: la possibilità di poter fruire di un adeguato sistema formativo senza affrontare i proibitivi costi di trasferimenti per ragioni di studio in altre sedi; inoltre, in linea con gli obiettivi generali di "Europa 2020", con questa tipologia di azione si intende agevolare il reintegro nel sistema formativo della popolazione studentesca che per qualsivoglia motivo ha abbandonato gli studi superiori (...)</p>

EACEA	Partnership	2011	XXX	Fara Celotto	StEP Student Enterprise Platform	The challenges, characterizing the current economic and social background, require to set up strategies for stimulating new job opportunities for young people. The entrepreneurial system makes wealth and produces jobs only if it's competitive and the competitiveness of a business is characterized by scientific research. Being confident of this argument, aware of needs of young people and businesses, sure that the small and medium enterprises invest too little in the research, we submit the project StEP that wants to incline the business towards potentialities and cleverness of youth. The web platform, result of the project StEP [Student Enterprise Platform], wants to be a meeting point, in both ways, between the needs of enterprises and the innovative, creative and technical resources of young people.
EACEA	Twinning	2002		Ferrari	Gemellaggio Marsiglia Cagliari	Il Progetto di gemellaggio Cagliari – Marsiglia è voluto fortemente dalle due città in questione per la stretta affinità che le contraddistingue. Entrambe città portuali del Mar Mediterraneo, influenzate culturalmente da un forte flusso di immigrazione dall'Africa Settentrionale, e interessate dal problema della globalizzazione dei traffici delle merci, sono oggi alle prese con la necessità di affermare nell'ambito dell'Unione Europea il proprio ruolo di città – ponte non solo verso le società nord africane, ma anche balcaniche e dell'Asia Minore. L'avvento del futuro allargamento dell'Unione fino a comprendere numerosi paesi dell'Est Europeo, pone innegabilmente il problema del ruolo che le città dotate di infrastrutture di
EACEA	Twinning	2011	XXX	Bonesso Brazzarola	TWIN T.E.AM. – Twinnings and Education for Fair Play Ambitions	Sport in the European Union is one of the most widespread human activities. It can contribute to the moral, social, intellectual and ethical development of human beings. However, the current image of sport has negative elements (violence among young people, supporters, wrong behaviour of athletes, pressure of business and media). In spite of threats of the culture of violence that could become a custom in sport, the future offers good opportunities. The TWIN T.E.AM. project wants to create a network to follow up an integrated methodology to prevent and fight against violence and intolerance in sport events. Its main objectives and activities include: improving the attitudes of young people to prevent violence and to influence groups through positive leadership (...)

EIE	EIE	2011	XXX	Brancaccio Cascone Giraud Pagano	Eco-Step	<p>Lo scopo di questo progetto è quello di promuovere l'adozione di un nuovo approccio all'eco-innovazione, incoraggiare l'adozione di una innovativa soluzione ambientale, incrementandone il mercato e rimuovendo gli ostacoli che ne impediscono l'accesso al mercato.</p> <p>La tecnologia, già esistente a livello prototipale, che i partners di questo progetto vogliono rendere commerciabile e diffondere sul mercato, ha come "materia prima" l'energia cinetica sviluppata dai movimenti del corpo, attività quest'ultima, che non sfrutta nessuna risorsa naturale (petrolio e in generale combustibile) e non produce nessuna emissione di anidride carbonica nell'atmosfera. Produce, invece, grazie alla notevole mole di "materia prima", grandi quantitativi di energia (...)</p>
EIE	EIE	2011		Pradella	Sustainable Energy in Historic Urban non Residential Buildings (SEEHURBS)	<p>L'obiettivo del progetto è quello di creare una maggiore consapevolezza nella necessità di applicare le direttive europee sul risparmio energetico anche agli edifici storici. Sebbene la direttiva europea 2002/91/EC non si applichi agli edifici storici, affrontare il recupero e la valorizzazione di quest'ultimi secondo le direttive del risparmio energetico può essere un importante veicolo di sensibilizzazione per la comunità e può agire da sprone affinché si possa creare una normativa sul risparmio energetico anche per gli edifici storici.</p>
EMPL	EMPL	2010	XXIX	Bassi	Skill Pass	<p>Promuovere l'ASL rivolta a giovani di età compresa tra i 16 e 25 anni a bassa e media qualifica frequentanti gli istituti di scuola superiore di II grado e corsi di qualifica professionale di prima formazione professionale, attraverso esperienze in aziende di nazionalità diversa da quella dello studente;</p> <ul style="list-style-type: none"> <li>- Costruire una rete organizzativa territoriale tra le Organizzazioni per la progettazione e gestione dell'ASL;</li> <li>- Rafforzare la cooperazione tra Paesi;</li> <li>- Potenziare la mobilità europea.</li> </ul>

EMPL	EMPL	2010	XXIX	Bielloni	Promotion of Housing Inclusion of Young - adult with mental health problems	The project should contribute to developing innovative approach to policy of housing inclusion of young people with mental health problems. With it will be possible to promote, in respect this young people, the transition from institutional care community- based to other alternatives (deinstitutionalisation). The relevant transnational projects will include partnerships between stakeholders that are involved in the process of social experimentation (public bodies, local authorities, no-profit organizations), in prospective of networking activities, developing of public policies, transferability process or inventory of achievements in a context of social inclusion within European Union.
EMPL	Programma Quadro Lotta all'Esclusione Sociale	2001		Garavaglia	I.W.I: Immigrated Women Integration - The european network against social esclusion	Poiché il processo di piena acquisizione dei diritti di cittadinanza delle donne immigrate da paesi extracomunitari "non ricchi" <sup>2</sup> , sole o che si ricongiungono ai familiari, è particolarmente impegnativo e poco considerato nella specificità di genere il progetto I.W.I: Immigrated Women Integration - The european network against social esclusion intende creare una rete europea per promuovere scambi di esperienze, confronto su metodologie di intervento e definizione di modalità comuni di azione. Allo scopo saranno utilizzate le possibilità offerte dall'uso delle nuove tecnologie di comunicazione multimediale. Il processo di integrazione viene da un lato rallentato da alcuni meccanismi culturali, economici e sociali che tendono ad aumentare la marginalità delle donne immigrate extracomunitarie; dall'altro le Istituzioni pubbliche faticano a dare risposte integrate ed operative a questi emergenti bisogni. In particolare (...)

Equal	Equal	2001		Bordini	RESET- REte SErvizi Territoriali	<p>Il progetto si pone sull'asse occupabilità e si rivolge, prevalentemente, alle giovani e ai giovani tra i 18 e i 25 anni, in particolar modo a quelli in condizione di disagio. Rispetto al problema occupazione e al target individuato, le regioni coinvolte presentano significative differenze. Bologna e Lucca hanno una domanda di lavoro che sarebbe in grado di sostenere l'offerta, se solo i giovani non avanzassero richieste non realistiche rispetto al loro inserimento. Rimane, tuttavia, difficile l'inserimento lavorativo e sociale di fasce giovanili in condizioni di maggior disagio. Nelle province meridionali, invece, il mercato del lavoro è assolutamente inadeguato rispetto alla consistenza dell'offerta di lavoro, in particolar modo di quella giovanile. Qui la formazione, il miglioramento delle proprie competenze, la capacità di muoversi nelle reti sociali appare ancor più decisiva. Senza contare le situazioni più "a rischio". Il territorio di residenza appare uno dei fattori più importanti per spiegare le dinamiche dell'inoccupazione/disoccupazione giovanile. Una conferma viene dai dati contenuti nell'Indagine sulle forze di lavoro dell'Istat relativa al 1999 – classe di età 15-24 anni – limitatamente al genere maschile e alle cinque regioni che saranno interessate dal progetto: (...)</p>
Equal	Equal	2001		Moledda	caratteri) : For.Tu.Sa. (Formazione Turismo Sardegna)	<p>L'area dell'intervento (la Provincia di Nuoro) è rappresentata dall'intero territorio provinciale, individuato con analisi shift-share e da dati forniti dalla Camera di Commercio. L'analisi struttura delle aree che si configurano come poli secondari di attrazione rispetto al capoluogo.</p> <p>A) Il polo primario di attrazione: l'area urbana di Nuoro - Il Centro residenziale e dei servizi (comuni della 1° corona) Campi problematici: desocializzazione, disoccupazione, disagio giovanile, difficoltà di accesso ad alcuni servizi, soprattutto quelli rari concentrati nel capoluogo, sia in termini di congestione di alcuni tratti principali in ingresso e in uscita, che di inadeguatezza del sistema di trasporto pubblico, disoccupazione, mancanza di mentalità imprenditoriale, infrastrutturazione.</p> <p>B) Le direttive esterne di specializzazione funzionale (...)</p>

Equal	Equal	2002		Sgrosso	Progetto LASA - Lavoratori Atipici in Serie A.	<p>Una parte di lavoratori, senza un contratto di lavoro a tempo indeterminato, che chiameremo atipici, è soddisfatto del proprio stato, quindi è tutt'altro che 'di serie B'. "Da una ricerca condotta dalla Cisl Lombardia emerge che il 37% degli interinali intervistati parla di autentica scelta professionale nonché di vita". Il progetto LASA intende rispondere al problema della formazione continua dei lavoratori atipici e si rivolge, in particolar modo, a quei lavoratori atipici (il 63% in Lombardia) che desiderano passare in 'serie A'. Agli atipici di 'serie B', lavoratori precari, il progetto LASA, tramite Centri per l'Elaborazione, l'Apprendimento ed il Telelavoro (CEAT), offre servizi, strumenti ed opportunità per rinnovare continuamente la propria professionalità e per diventare più competitivi sul mercato del lavoro. I servizi offerti dai CEAT aiutano i lavoratori atipici ad essere soddisfatti del proprio stato o a cambiare stato, come i delfini quando saltano fuori dall'acqua, per diventare imprenditori o lavoratori dipendenti. (...)</p>
Equal	Equal	2011	XXXI	Pantanelli Falzone	Studio e sperimentazione di modelli integrati di servizi sociosanitari territoriali	<p><b>Macroarea 1: ANALISI E DIAGNOSI</b>      Questa macroarea prevede le seguenti fasi:</p> <ul style="list-style-type: none"> <li>• La Ricerca con i seguenti obiettivi:</li> <li>• avere un quadro di insieme analitico che fornirà la necessaria base scientifica per l'elaborazione delle successive fasi di lavoro;</li> <li>• analizzare i servizi esistenti in termini di efficienza, efficacia, economicità e gradimento;</li> <li>• individuare nuove aree di mercato, nuovi servizi, nuove modalità di approccio nella gestione dei servizi medesimi;</li> </ul>
EuropeAid	Asia Urbs	2002		Rossi Nardin	Planning of Sa Pa urban tourism development	<p>a) The aim of the project:</p> <ul style="list-style-type: none"> <li>• To upgrade and update Sa Pa Local Government skills in urban management, socio-economic development, urban environment and urban infrastructure;</li> <li>• To provide Sa Pa with an effective urban planning and sustainable tourism development through a Master plan and a Detailed plan with detailed section for tourism activities development in the period 2003 - 2030;</li> <li>• To upgrade and update local skills in tourism management of disposable resources, both natural and cultural/traditional;</li> <li>• To contribute to set up a more attractive environment for the presence of</li> </ul>

EuropeAid	Capacity Building	2009	XXVIII	Brizi	Strengthening the capacity of ethical review of clinical research in developing countries	This project finds its origin in a sharing of interests and values, which brings together Ethics Health for All –EHFA- and the African Malaria Network Trust –AMANET- and its aim is to support the efforts of Tanzanian National Medical Research Coordinating Committee (MRCC) and the local professionals working with, in reviewing clinical research in compliance with international laws and regulations and in respecting the human rights of patients. EHFA experience sprouts from a deep interest of its founders on clinical research, human rights and the deep necessity to (...)
EuropeAid	EuropeAid	2011	XXX	Mule Panciotto	Youth leaders through art and culture	To contribute to create new opportunities for youth empowerment in the sectors of art and culture, to include youths as protagonists in the social and economic development process in South Africa. Specific objective: A) Improved youth skills to reduce the youth unemployment; B) Increased the social inclusion level of disadvantaged youths; C) Created a networking process between young people and other actors of all south African provinces.
EuropeAid	EuropeAid	2011		Brriello Durzio Esposito Principio	Educazione e Sviluppo	La nuova interpretazione della cooperazione definita dalla Commissione Europea è l'espressione di un modo innovativo di concepire lo sviluppo equo e sostenibile fondato sulla partecipazione, la capacità degli attori, la promozione dei diritti e delle libertà fondamentali. Il valore aggiunto riguarda l'impegno politico delle Autorità Locali (AL), la sensibilizzazione e la mobilitizzazione delle competenze delle risorse finanziarie addizionali da parte delle istituzioni e del territorio attraverso partenariati pubblici e privati. Così nei paesi della Comunità Europea ed in Italia in particolare, a partire dagli anni '90 il ruolo delle AL delle comunità e delle organizzazioni della società [richiedere al corsista]
EuropeAid	EuropeAid	2012	XXXIV	Morandi	Advanced Multimedia Storytelling	

EuropeAid	EuropeAid	2012	XXXIV	Morosillo	"A possible world"	<p>As already highlighted in sections 0.1. and 0.2., the project intends to positively impact on the attitudes and behaviours of European citizens by stimulating a greater sensitivity towards the interdependent development issues and by fostering the level of public mobilization and engagement in favour of policies and actions supporting global attempts to fulfil the Millennium Development Goals. The change of attitude and behaviours is pursued through an extensive educational and awareness raising action focusing on the themes of the 7th MDG and targeted to young people being in between 15 and 24 years of age. The proposed educational and awareness raising strategy will be experimented in 4 different European territories, namely Częstochowa (Poland), Osijek (Croatia), Stuttgart (Germany) and Verona (Italy) and it has been primarily conceived to respond to the actual gap in DE/AR offer for young people registered in the aforementioned cities. Past European projects in the same field, in fact, have shown how DE/AR services offered by the four territories are mainly targeted to children and pre-adolescents (8-14 years old) and implemented within the formal sector, [...]</p>
EuropeAid	EuropeAid	2012	XXXIV	Rosina - Levantesi	La questione di genere nelle politiche pubbliche municipali in Argentina: costruzione del riconoscimento e della partecipazione delle donne	<p>L'azione proposta intende contribuire alla realizzazione degli obiettivi del programma tematico Invertir en las Personas, inserendosi nelle linee d'azione e nel quadro operativo del EU Plan of Action on Gender Equality and Women's Empowerment 2010-2015. Quest'ultimo si propone di rafforzare le capacità e la struttura delle entità pubbliche e private e delle Organizzazioni della Società Civile sui temi del genere al fine di favorire l'accesso delle donne alle entità ed organizzazioni stesse e consentirne il controllo delle risorse economiche favorendo, altresì, una maggiore disponibilità di servizi ed opportunità che consentano alla popolazione femminile di accedere al mercato del lavoro ed al reddito in regime di parità di condizioni. [...]</p>

Fondo Asilo e Migrazione	Immigration	2010	XXIX	Buracchi Venturini	Migrant's Education and Network Tools for Relationship	The European Council held in Thessaloniki in 2003 reaffirmed the importance of encouraging cooperation and exchange of experience and information on the integration with the aim to learn from each other; this indication has been transposed by the three editions of the Handbook on Integration. Together with CPBs, adopted in support of a coherent European framework for the integration of people from third Countries, the handbook provides the basis for strengthen immigrant integration in Europe. The Hague Programme emphasises the need for a better coordination between / .
FP 5	E Content	2002		Ceccarelli	Satellite development Network for Exchange among Content Agencies	Knowledge diffusion through strengthening of informative and telematic networks fosters the acquaintance of international scenarios and facilitates decisional processes for participating establishments in order to improve local economics. This present proposal aims at enhancing local territories through the optimisation of the services through which users, that is public bodies, companies, undertakings or foreign investors alike, have access to the information pertaining to the various economic, social, political, administrative and environmental phenomena allowing the identification of a territory's potential. The delay in the computerisation of Local Public Administrations does not favour the user acquisition of reliable, exhaustive and timely information, allowing the (...)
FP 5	Pesca	2001		Termine Ruffini Lariccia	MEDITERRANEAN USERS FOR SUSTAINABLE ACTIVITIES NETWORKING	The initiative aims to promote support policies for craft near-water fishing in Mediterranean countries and to encourage the debate, exchange and comparison among scientific institutes, local authorities and manufacturing firms operating in the Mediterranean, thus establishing scientific priorities and future management policies. The already existing partners' synergies could consolidate and facilitate experience, ideas and best practice exchange to lay out a sustainable exploitation model for resources and assessment tools applicable to the entire basin, and further develop the FCP in a Euro-Mediterranean co-operation policy. It is planned to conduct a multidisciplinary research to draft a preliminary synthetic document, to organise an international meeting to disseminate results, and to reinforce existing networks and their interaction so that future co-operation between interested partners and countries could be ensured.
FP 7	Cooperation	2011	XXIX	Leanza	BESTCELL	Our sun is the only sustainable energy source large enough to supply carbon-neutral energy to meet humanity's entire energy demand <sup>1</sup> . However, there is a large gap between Europe's solar energy use (less than 1% of the total) and the enormous, untapped potential of the sun. There could be several reasons listed why it is so – social, political, technological – but the fundamental reason is insufficient efficiency of sunlight-to-energy conversion devices made of reasonably cheap materials. Along with thermal and photoelectrochemical sunlight-to-energy conversion, photovoltaics – an approach of (...)

FP 7	Cooperation	2011	XXIX	Urbinati	Short-lived Atmospheric Components Affecting Climate and Air Quality	The Short-Lived Atmospheric Components Affecting Climate and Air Quality (CLIMAIRQ) project focuses on bringing together leading scientists on climate/air quality and policy-oriented questions in an effort to develop and assess optimal co-beneficial, robust and politically useful emission abatement strategies for short-lived climate-forcing components such as aerosols, ozone and its precursors to simultaneously mitigate climate change and air pollution. The work will be carried out in a policy-oriented framework starting with the latest results on mitigation of climate and air pollution, to assure the best possibilities to disseminate the results from CLIMAIRQ. Three key regions, EU, the Arctic and the Indian sub-continent, have been selected in which the developed abatement strategies will be refined and assessed concerning its regional and global effects. The strategies will be adapted according to economical possibilities, political situation, and to the policy process in the specific regions. Emission data bases will be updated along with the development of (...)
FP 7	FP 7	2009	XXVIII	Bertoli	BIOVESTA - BIODiversità Vegetali per lo Sviluppo del Territorio e dell'Ambiente	Valorizzazione di biodiversità vegetali dell'areale euro-mediterraneo per la politica di sviluppo del territorio e la salvaguardia ambientale in risposta ai cambiamenti climatici. Creazione di banche dati di riferimento per la salvaguardia di biotipi vegetali dell'areale mediterraneo e selezione di materiale vegetale utile per integratori alimentari, cosmetici, fitoterapici a base di estratti naturali. Il progetto quindi si baserà sull'attività (...)
FP 7	ICT	2009	XXVIII	Beraldo	European Art Contents Search System	Europe owns, given the long history of her members, a great cultural heritage, which literature and art generally speaking are parts of, as painting and sculpture. The project aims to develop a new Multilanguage search engine that, given the search keys, is able to locate the contents linked to from more than one European culture and to present what found by multimedia systems. This engine will be used to search for over the networks ( Internet or other regional networks), in order to facing the new semantic search engines that enable more efficient and extensive searching methods, analyzing the relations between words and contents. The european cultural heritage is subject to research and studies from many countries over the world, and will be so at disposal to inquiry by a European search engine, joining in this manner a unique heritage and impossible to substitute with the technology able to access that, developed in Europe also; the study in depth of five language, Latin and Greek included, is a must compared to other engines to search information recorded nowadays, and that enables enquiries by one of the languages on documents recorded using the others.

FP 7	Idea	2011	XXXI	Vitale	PLANE - Plasma based facility for Archeometry, Nuclear physics and Energy application	The development of innovative plasma traps can be the basis for pioneering investigation in nuclear physics and multidisciplinary applications. Plasma based ion sources, in addition, are used as injectors for several ion accelerators (Linacs, Cyclotrons, etc.) with optimal performances in terms of ion beam qualities. The most part of facilities for particles and nuclear physics (e.g. LHC at CERN and SPIRAL2 at Caen) employ Electron Cyclotron Resonance Ion Sources (ECRIS) as primary injectors. Plasma based ion sources are used in (...)
FP 7	Marie Curie	2011	XXIX	Mazzai	VeNIGHT, Venice Researchers' Night	The VENIGHT Project will bring the Researchers' Night 2010 in the extraordinary location of Venice, one of the most exciting and beautiful cities in the world. The project aims to bring researchers face-to-face with the broad public. This will be achieved by shading light on how researchers's life and work are closely related to society and the common people (...)
FP 7	Support for Frontier Research	2011	XXXI	Bullitta	Mediterranean plant species for environmentally safe management of livestock pests and parasites.	The proposal aims at developing a multidisciplinary international network committed to deepen basic knowledge on the potential of Mediterranean plant species for a natural and environmentally friendly biocontrol of pests and parasites of worldwide medical and veterinary importance. The use of pest management strategies alternative to the application of chemicals is required to preserve environment and human health. Many synthetic pesticides have been banned (Council Directive 91/414 EC) or are being under evaluation (Regulation 2009/1107/EC, Directive 2009/128/EC) and the discovery of safe active ingredients for the management of pests of medical and veterinary importance is to be promoted. The use of chemicals is causing public concerns and real risks for the environment and human health, as well as the destruction of non-target species and the development of pest resistance against many pesticides. Plant and insect interactions are chemically mediated by plant secondary metabolites such as phenylpropanoids, phenolics, terpenoids, steroids, alkaloids, nitrogen compounds. However only few of them have been characterized. Parasitism is one of the greatest disease problem in grazing livestock worldwide and its control through chemoprophylaxis is problematic due to the rise in drug-resistant (...)

FP7	People	2012	XXXV	Selva Verzica	Cosmos	Corrosion of steel reinforcement is the main factor responsible for shortening the service life of reinforced concrete structures by significantly compromising their durability. As a matter of fact, the most effective approach to produce durable and sustainable concrete structures is to manufacture a high-quality concrete according to [...]
Health	Health	2011	XXXII	Zucchelli	European Registry on Chronic Pain Patients, Differently Aged, Requiring Intrathecal Therapy	Severe and refractory persistent pain or spasticity can respond to treatment with Intrathecal Drug Delivery Systems (IDDS), which attain satisfactory pain control by local administration of analgesic/anaesthetic or specific drugs and improve the quality of life of patients. Upon emergency, however, the presence of IDDS can complicate the management of fragile patients, when IDDS malfunction is not a cause of emergency itself. In this scenario, a life-threatening gap becomes evident between the specialististic know-how on how to prevent or handle damage to IDDS and the patient management by primary or emergency care professionals with no IDDS expertise. REGAIN PATH aims at bridging such gap, by making available crucial information on IDDS in general and on the single particular enrolled patient, so as to allow to correctly handle the device, manage its main complications and contact specialists for reference and advice. By creating a European registry of IDDS patients, we expect to promote (...)

Health	Health	2012	XXXIV	Giorgione	SLoW-DOWN" OBESITY AMONG CHILDREN	<p>Obesity has emerged as one of the greatest global health challenges of the 21th century and its increase among children and adolescents is particularly frightening, given the associated metabolic and cardiovascular complications and certain cancers.</p> <p>SLoW aims at contribute to tackle the growing trend of obesity rate in EU Member States among children and adolescents aged 5-17 years according to the objectives of the "White Paper on a strategy for Europe on Nutrition, Overweight and Obesity related health issues" and the "Second programme of community action in the field of health 2008-2013" by achieving two specific objectives of the work plan 2012:</p> <ul style="list-style-type: none"> <li>- promoting health, including the reduction of health inequalities;</li> <li><u>- generating and disseminating health information and knowledge</u></li> </ul>
Justice	Daphne	2002		Magnabosco	The Tribe's Cry - Itinerant Interactive Museum against Violence	<p>The project for the "Itinerant Interactive Museum against Violence" includes socio-anthropological research and parallel active intervention in high schools, directly involving adolescents and teachers. The methodology used in both actions will be that of "participant observation". The research will be conducted by the Department of Educational Sciences of the University of Paris 8 and it will include the results of the previous Daphne projects, while the action in the schools will be conducted in Italy and in Portugal, including workshops on the use of different materials (photo, graphics, video, theatre, performances); and direct participation of the students under the guide of various experts: psychologists, anthropologists, media people, theatre workers, architects. The final product will be an itinerant Museum created by the adolescents themselves which can be exported to other realities in Europe.</p>

Justice	Daphne	2010	XXIX	Campagnuolo	The child'rights to defend	<p>Il problema della violenza perpetrata ai danni di bambini e di adolescenti, costituisce una dolorosa piaga della società odierna. Nonostante l'impegno delle politiche nazionali ed internazionali, le vittime di comportamenti violenti risultano ancora numerose e spesso ignare dei diritti e delle procedure da intraprendere per tutelarsi, denunciare ed ottenere sostegno. Questo fenomeno riguarda principalmente i minori e le famiglie che vivono in zone e quartieri popolari, i quali costituiscono dei veri e propri "ghetti", privi di stimoli culturali in cui la violenza ed i comportamenti devianti sono parte integrante della loro quotidianità. Considerato che i risultati degli studi, delle ricerche e delle azioni condotte a livello locale, nazionale e sovra-nazionale risultano essere utili per gli esperti, ma difficilmente accessibili agli abitanti di tali quartieri. E' necessario intraprendere, in tali quartieri, azioni dirette a contrastare la cultura dell'omertà, della vergogna di aver subito e del timore di rapportarsi alle istituzioni preposte alla tutela. Per le suddette ragioni si mira a sensibilizzare e a informare le potenziali vittime ed i cittadini sul problema della violenza e dello sfruttamento sessuale di adolescenti, affinchè siano percepiti come fenomeni sociali. In tal modo si mira a coinvolgere attivamente ogni cittadino nel processo di scardinamento della cultura del silenzio.</p>
Justice	Daphne	2012	XXXII	Cicetti	ME against Homophobic Bullying - MEntoring MEthod against Homophobic Bullying	<p>The objective of the project is providing knowledge, competences and tools (i.e. the innovative mentoring method) to students, teachers and parents in order to make them able to prevent and fight cases of psychological, verbal or physical violence relating to homophobic bullying (HB) among young people. In details, the project aims to :</p> <ul style="list-style-type: none"> <li>- improve the knowledge of HB in the school context of different European countries;</li> <li>- educate young people, teachers and all social actors about adolescent issues related to sexual identity, their impact on family and other teenagers, the HB and its causes/consequences, the respect all different kinds of sexual orientation;</li> <li>- inform young people, teachers, (...)</li> </ul>

Justice	Daphne	2012	XXXIII	Baldiotti	AVOW: Adolescents Victims Or Witnesses recognize and disclose domestic violence	<p>Research studies and interventions have been implemented in order to stop domestic violence against children and to tackle the negative effects on the victims of this phenomenon. It is crucial to stop this problem addressing one of the elements which restrains the reduction of this harmful action: the difficulty for children to speak about and express the negative experiences they suffer from within their family. Indeed, an incapability of children's "expressing domestic violence" will perpetuate the violence experience and increase the high risk of psychosocial related diseases. Domestic violence against children (age 11-18) is difficult to be detected and addressed mainly due to two factors: the incapacity and worry of victims to avow their experiences, and the difficulty of adults to welcome children's revelation and manage its consequences. So, working on enabling children's disclosing themselves and on improving adults' ability to deal with it, represents the proper approach to restrain violence and prevent the aggravation of psychosocial conditions in victims. AVOW - "Adolescents Victims Or Witnesses recognise and disclose domestic violence" aims at enhancing the conditions of both target groups: children (age 11-18) and adults of the community (teachers, sport trainers, stakeholders, social/health professionals, educators, pastors, families, community workers) so as to ease the disclosure by children of their distress. (...)</p>
LIFE	ENV	2003		Cartolano	ELECTRA (ELECTric Clean TRAnports)	<p>L'obiettivo del progetto è il miglioramento della qualità dell'aria e diminuzione del livello di rumore nell'area urbana, da perseguiarsi riducendo l'impatto dei trasporti mediante la promozione dell'utilizzo di veicoli a due ruote elettrici. Si vuole coniugare l'obiettivo primario della salvaguardia dell'ambiente con un modello di mobilità sostenibile che non deprima le attività economiche ma che ne funga da volano, stimolando la diffusione di soluzioni tecnologiche innovative sinora relegate al solo mondo della ricerca. Un ulteriore obiettivo è quello di costituire un buon esempio e stimolare in futuro l'elaborazione di analoghe politiche regionali che diano risposte concrete ed immediate al problema dell'inquinamento delle città (...)</p>

LIFE	ENV	2005		Silvestri	Making International Sustainability Show-cases in three regions of the European Union	Il progetto ruota sulla realizzazione, in ognuna delle tre regioni, di una "Vetrina della sostenibilità", spazio fisico dove esibire tecnologie, pratiche e prodotti che fanno della sostenibilità ambientale il proprio elemento qualificante. La funzione meramente espositiva, pure avendo una fondamentale importanza per la promozione e la diffusione di innovazioni e prodotti spesso conosciuti a imprenditori ed addetti, non è l'unica della Vetrina: essa, infatti, rappresenta anche un luogo di lavoro permanente in cui organizzare dimostrazioni, testare e monitorare nuovi prodotti, allestire momenti seminariali e formativi rivolti ad amministratori e, in via principale, agli imprenditori. (...)
LIFE	ENV	2005		Sivero	SWING - Sustainable exploitation of Wind's Energy in Urban and suburban environments	La pianificazione energetica della Liguria fissa gli obiettivi di sfruttamento di risorse energetiche rinnovabili nei prossimi cinque anni (10% compreso vento, biomasse, sole ed acqua.) Per raggiungere tali obiettivi, il Piano Energetico deve prendere in considerazione: l'inserimento ambientale di impianti di produzione energetica nel territorio, la qualità dei progetti e l'esigenza di azioni di mitigazione e compensazione. Questo è vero anche per gli impianti eolici. Attualmente le risorse rinnovabili nella Regione contano per il 7% della produzione energetica regionale. Il piano energetico vigente, pertanto, non è destinato alla localizzazione delle aree di captazione del vento ma è utilizzato, in modo generale, dall'Autorità Regionale che
LIFE	ENV	2005		Zanoni	Servizio di ritiro delle cartucce usate per stampanti (Used Cartridges Service)	The objectives are: 1) drastically reduce the draining of reusable cartridges 2) To significantly increase the regenerated market and consequently lower environmental impact of each cartridge 3) Creation of a new service 4) To make the project self-sufficient (at least partially) thanks to the resale in Europe 5) To introduce a new mentality in the respect of the environment 6) To save up virgin raw materials and energy in the production cycles and in the recycling factories. (...)
LIFE	Nature	2003		D'Amato	Restauro ambientale e gestione integrata del Lago di Fimon	Objective: as the title shows, the main objective of the project is the environmental restoration of the Fimon Lake and its sustainable management. The environmental restoration mainly refers to: - restoration and spread of the shore habitats such as Carex spp. humid meadows and reed thicket ( <i>Phragmites australis</i> ); - monitoring the lake water pollution; - reduction in exotic ichthyic fauna of the lake. The integrated management mainly refers to: - rationalization of the fishing activity; - promotion of a touristic activity compatible with the conservation of habitats and species included in the Community Directive 92/43/EEC; - involvement of the local community in the lake management and conservation.

LIFE	Nature	2011	XXX	Seoni Frau	ST.eR.N.A Stagni e Risorse Naturalistiche e Ambientali di Casaraccio	Lo stagno di Casaraccio risulta essere una delle zone uniche più importanti del Nord Sardegna per la presenza nelle diverse stagioni dell'anno di specie di uccelli importanti dal punto di vista della conservazione della natura. I periodi di nidificazione, di migrazione e di svernamento vedono numerose specie e molti esemplari che utilizzano il tratto di terra della penisola di Stintino per attraversare l'importante barriera ecologica del nord mediterraneo attraverso il ponte sardo – corso. La base di dati dei censimenti coordinati dall'Institute for Warterfowl Council (IWC), ci permettono di analizzare le presenze degli uccelli acquatici svernanti negli ultimi 20 anni. Osservazioni sporadiche anche raccolte in maniera non standardizzata (...)
LIFE	Nature	2011	XXXI	Caniatti Murgia	Parco Nazionale Alta Murgia	L'obiettivo del progetto è il recupero delle zone umide presenti sul territorio del Parco Nazionale dell'Alta Murgia, del SIC Murgia dei Trulli e del SIC Laghi di Conversano. Le zone umide interessate dal progetto rivestono un ruolo importante nell'ecosistema mediterraneo ma purtroppo oggi le condizioni degli stagni temporanei mediterranei versano in condizioni di degrado ed elevata relittualità. Il progetto si propone quindi di ripristinare l'habitat 3170*, dove presente o documentato, di proteggere le specie animali (soprattutto macroinvertebrati) legati agli habitat 3140 e 3150, come parte di una politica globale dell'unione per arrestare la perdita di biodiversità, (...)
LLP	Comenius	2011	XXX	Tonin Farina	Da tecnici a formatori	Il sistema della formazione professionale in Europa è riconosciuto e diffuso in tutti i paesi dell'Unione con la sigla VET (Vocational Education and Training). All'interno delle Vocational School il profilo dell'insegnante tecnico è in genere quello di un tecnico che si occupa anche dell'insegnamento delle proprie competenze pratiche. Non è però richiesta per questa figura alcuna competenza pedagogica. Si riscontra quindi, a fronte di un livello solitamente elevato di abilità tecnica del docente nella materia, una generale carenza di strumenti teorici e pratici in ambito pedagogico e di metodologie didattiche. (...)

LLP	Comenius Multilateral	2012	XXXIV	Lonardi	Eduglocal	<p>We believe that the school systems of Europe need to develop civic and social competences in the younger generations towards a sustainable development. This is of primary importance for the future of humanity itself. So "Think global - act local – learn 'glocal'" is the motto of the project. We aim to engage teachers, school leaders and young people in thinking and reflecting upon global problems whilst acting locally.</p> <p>"Glocal Education" needs: at cultural level, an holistic and inter – disciplinary approach; at pedagogical level, active and workshop – based methods. For this purpose, Eduglocal joins expertise of Partners of both formal and informal educational system, in order to [...]</p>

The logic of construction of the project is a model of sustainable and transferable intervention on meta-cognitive approaches in early age learning processes. The key objective is to innovate curricula by strengthening the system of pre-school teaching / learning with the implementation of a training plan addressing school staff (Milestone 1) and a model of meta-cognitive intervention model aimed at strengthening skills for lifelong learning in early childhood (Milestone 2).</p> <p>ME.E.T is based on the concept of Disabilities for Ability where experiences and good practices enhance skills and competences in contexts of disability and special educational needs, for a better capacity of education systems to be inclusive and</p>
LLP	Comenius Partnership	2012	XXXIII	Trifiletti	MS2019	<p>The project "Matera e Sofia: Due culture obiettivo 2019" will give participants the opportunity to learn more about different traditions, languages, histories and cultures, in order to strengthen tolerance and integration between peoples. Through the organization of a photo contest, a photo exhibition and a "Flash Mob" event, and the creation of an electronic photo book will be reached the two main project's goals. The first project's aim is the value of "Sassi" of Matera and the Boyana Church in Sofia became UNESCO World Heritage Site in 1993 and in 1979. The "Sassi" of Matera are a unique urban ecosystem, able to perpetuate from the most distant prehistoric past, the ways of living in the caves until modern times and the Boyana Church, one of the few medieval monuments perfectly preserved as evidence of the important contribution of [...]</p>

LLP	Grundtvig	2009	XXVIII	Masullo	Guidance for Integration of Migrant Women	The project XXYYZZ aims at improving the integration opportunities for migrant women residing in the EU, and in particular on the partner's territories, throughout an action of valorisation of their formal, non formal and informal competences. The project is focused on the realization and the experimentation of an Intervention Model, shared at European Level, which enable the different stakeholders (in the field of guidance and employment services) to carry on efficient services, able to meet the needs of migrant women. This activities will be carried on through the "valorisation of their competences" starting from the educational level analysis (formal paths) and from the comparison among them, with the aim of evaluating the competences coming from the formal and non formal paths emerging from the guidance activity. XXYYZZ aims at developing innovative paths to: (...)
LLP	Grundtvig Multilateral	2012	XXXIV	Baschiera	Agorà	<p>Agorà' is a project designing to answer to the needs of Ageing population, Senior citizens, vulnerable groups like migrants, people at risk of poverty and social exclusion. In European towns, environments for promoting a society for all ages and culture are still not accessible. Senior Citizens do not find new ways to exercise their civic skills in the modern society also in the potential connections with young generation. The project would strengthen "participation in society" as one of the three dimensions of active ageing, widening the participation of different targets to the knowledge society. The main specific objectives of the project are:</p> <ul style="list-style-type: none"> <li>• To foster motivation and leadership of senior citizens helping them to individuate new roles</li> <li>• To enhance the perception of the active citizenship of [...]</li> </ul>
LLP	Grundtvig Multilateral	2012	XXXIV	Gatto	Training Professionals and Civil Defence Volunteers in Network to Safeguard Delta Territories	The project "Training Professionals and Civil Defence Volunteers in Network to Safeguard Delta Territories" derives from the fact that in recent years there has been an increase of flood events in autumn in areas crossed by rivers which have led to serious tragedies such as the destruction of houses, buildings for production and commercial activities, infrastructures and even victims with consequent impoverishment of the community invested by disasters. The floods are the result of a series of reasons: surely climate changes at the global level but the most obvious contributing factors are uncontrolled urbanization as a result of deforestation to which no new tree planting follows, no cleaning and control of canals and drains. All this derives from a lack of knowledge of the territory by local institutions and by regulations outdated and therefore insufficient, inadequate for effective prevention and environmental protection and for an updated civil defense ready to respond to disasters. The project is developed on the deltas [...]

LLP	Grundtvig Partnership	2011	XXXII	Zoso	EXTRA - Experiential training - from metaphorical learning to working and real life environments	EXTRA focuses on experiential training methodologies. Experiential approaches integrate classical learning processes (propositional/procedural knowledge) with the new dimension of emotional knowledge. Learners are involved into metaphorical interactive sessions allowing them to experience transversal skills and to bring back learned behaviours to working environments and real life situations. The partnership is made of 7 training bodies from 6 EU countries. It covers the European territory and mixes different fields of actions and training curricula. The project develops by 2 connected levels. Transnational mobility/meetings: participants test as direct actors on-field methodologies in each of the countries touched by the project, in order to actively gain professional/personal growth. Meetings then schedule thematic workshops, for deepening specific aspects of practical sessions and define common transnational perspectives and further developments of experiential methods. Local activities focus on the improvement of ordinary training approaches through benefits provided by (...)
LLP	Grundtvig Partnership	2012	XXXIII	Riccardi Schiariti	BABEL - Barriers and Bridges: Enabling a Link	I.R.I.S. has been working on intercultural matters for over twenty years in a borderline Region and is used to deal with actors from the whole Europe. For a European organisation operating in the field of training and in local development projects, a cooperation with (...)
LLP	Grundtvig Workshop	2011	XXXII	Calzavara	Politiche e strumenti a sostegno dell'imprenditoria e del lavoro femminile in Europa	Il workshop si terrà dall'8 al 14 ottobre 2012, presso Venezia (Italia). Il tema trattato sarà il seguente: Politiche e strumenti a sostegno dell'imprenditoria e del lavoro femminile in Europa (Policies and instruments to support women's entrepreneurship and work in Europe). La lingua utilizzata sarà l'inglese e i destinatari imprenditrici/tori, Associazioni e Comitati per l'imprenditoria, Camere di Commercio – Associazioni sindacali. Il numero di partecipanti previsti è di 15 persone. Il programma sarà il seguente: (...)
LLP	Grundtvig Workshop	2012	XXXIII	Zanin	L'educazione emozionale	Attraverso questo workshop, i partecipanti migliorano le loro capacità di riconoscere, denominare e controllare le emozione per poi indirizzarle in senso produttivo. Essi diventeranno quindi più auto consapevoli, cioè sapranno riconoscere la propria forza e le proprie debolezze, sapranno considerarsi in luce positiva, ma realistica. Impareranno inoltre a comprendere i sentimenti altrui e assumere il loro punto di vista, rispettando i diversi modi in cui le persone considerano una situazione. Apprenderanno l'arte di collaborare, di risolvere conflitti e negoziare i compromessi e anche di ritardare le gratificazioni e a reprimere gli impulsi. Migliorando questi aspetti le persone riusciranno a [...]

LLP	Jean Monnet	2012	XXXV	Mungelli	Lifelong EU. Education towards European Citizenship.	<p>The study of the European integration process in schools is mostly underestimated, when not totally absent. The main aims of this project are to raise awareness of European citizenship among young generations and to improve also the ability of school teachers to explain the EU. These goals will be reached through a series of meetings in schools and a training course addressed to teachers.</p> <p>Meetings in schools (see F.3.3) will be managed by young trainers, selected among MA students of the Faculty of Political Science "Roberto Ruffilli" of Forlì (constantly top-ranked, especially for its assets in the internationalisation field ), Erasmus students and EVS volunteers in the Emilia-Romagna region. Their solid education in European Studies will be integrated with an ad hoc training course (see F.3.2). The project foresees about 150 meetings in schools in order to have a direct impact at least on 2000-3000 [...]</p>
LLP	KA 3	2009	XXVIII	Pinna	eMusicalLearning: teaching and learning music through new technologies	<p>eMI is a pilot project with the aim to experiment with a professional teaching method of musical subjects through the realisation of a multimedia platform. The socioeconomic context of partners involved is characterized by an amateur approach to art, and to music too. Therefore the offer of educational programmes is limited because of the unfavorable cost - benefit ratio. This scene has worsened as a result of the adverse economic situation which don't provide incentives for a changing in the way of thinking towards investments in musical education. Similar economic evaluations are applicable to (...)</p>

LLP	Leonardo DOI	2012	XXXIII	Bonesso (Francesca)	DELFI - Design Entrepreneurship and Leadership For Inclusion	<p>Economic crisis, unemployment, widespread mental depressing and psychological troubles: this is the current EU worrying background. Today the EU is facing, on the one hand, the future 2020 perspectives where the occupational aim is significant and, on the other hand, the economic crisis and its connected unemployment wound. In this background mental depressing and psychological troubles related to the unemployment problem are a pressing challenge to be faced by the EU. The aim of this project is to create new occupational fields for those people who are increasingly affected both by mental depressing and psychological troubles and unemployment. In particular the DELFI project proposes innovative starting points to the employment policies that are generally applied to the project target group. It looks at introducing a model that, at the same time, satisfies both the formative and the occupational needs of the interested target group. It means to create a formative model recognized at the European level as an ECVET agreement, whose aim is to improve the entrepreneurship and creative capabilities of these people in a dynamic field like the design sector.</p> <p>This idea, besides producing skills that are directly applicable to the market, proposes to break the isolation in which these people are often destined and the prevailing short period point of view.</p> <p>Another significant priority of this project is to provide more data to the phenomenon of the target group's professional integration within the EU, in order to face the existing scanty, disjointed and incomplete statistics about this topic.</p>
LLP	Leonardo PLM	2010	XXIX	Contrino	PROFESSIONALITA', DONNE E TECNOLOGIA. Tirocini per la specializzazione femminile in materie tecnologiche.	<p>Il progetto è rivolto a donne under 35 che abbiano conseguito la Laurea (3 o 5 anni) in Ingegneria, Architettura o Informatica, presso le Università di Ancona, Urbino, L'Aquila e Reggio Calabria. L'interesse verso questi settori è dovuto alla loro rilevanza in materia di innovazione tecnologica e scientifica, oggi più che mai fondamentale strumento di miglioramento della generale situazione economica di crisi. PRODONTE è un progetto di mobilità il cui obiettivo è fornire la possibilità ai giovani di consolidare la formazione professionale con tirocini all'estero presso organizzazioni o aziende specializzati nelle loro materie di studio, così da consentire l'acquisizione e lo scambio di know-how di qualità; senza dimenticare che uno stage all'estero è un'occasione di potenziamento delle lingue, di interazione e scambio tra culture differenti, una possibilità per le beneficiarie di vivere l'esperienza di cittadino europeo: obiettivo finale è l'acquisizione di</p>

LLP	Leonardo PLM	2011	XXXII	Riva	ENProS - Emergency Nurse Professionals' Skills to improve quality of health services	Il progetto coinvolgerà 5 team (composti da 10 infermieri ciascuno) di infermieri provenienti da diverse realtà ospedaliere italiane, i quali effettueranno 2 settimane di tirocinio in un contesto estero altamente qualificato: il Regno Unito e in particolare Manchester sono infatti la patria delle best practices in tema di triage infermieristico e di gestione degli accessi a bassa priorità da parte del personale infermieristico dei pronto soccorsi (PS), con particolare attenzione ai traumi minori. Tale esperienza costituirà un valido contributo all'implementazione, in diverse città italiane, di modelli assistenziali che prevedano una maggiore autonomia e responsabilità dell'infermiere esperto, anche nella gestione di aspetti clinici con connotazioni di urgenza. Apporterà inoltre elementi di innovazione ed efficienza nelle modalità di cura e gestione dei percorsi di assistenza presso i pronto soccorsi
LLP	Leonardo PLM	2012	XXXII	Petrillo	Vocational Education and Sectoral Training network on geological domains	Daily geologist professionals are involved to plan, manage, solve new complex problems in the process of managing the use and development (in both urban and rural settings) of land resources. Due to the growing request of special skills for public and private needs, geologists constantly have necessity to access to continuous vocational training and possess multitasking competencies. The main purpose of the project is to provide to Italian graduates and professionals in Earth Sciences to spend a work experience in a different EU country to gain new skills, knowledge and qualifications. Our association aims to

LLP	Leonardo PLM	2012	XXXV	Bizjak (35) Zupan (33)	Italo-Croatian Mobility in Europlanning	<p>Croatia's adhesion to the European Union, due on July 1st 2013, urges to address the poor knowledge of European institutions, policy and funding opportunities. In the frame of major cohesion among member states and in agreement with the policy of inclusion of new countries, the general aim of this project is the transfer of knowledge and specific competences in the field of European project planning and management with all related practical issues.</p> <p>The specific aim of this project is to train 38 newly-graduates, young professionals and unemployed people in the field of EU funded projects. The Lead partner of the project will be the Croatian Institut za međunarodne odnose (IMO), who will work in tight cooperation with the receiving partners in Italy during the whole project. The successful candidates will be selected by the LP and will follow a working experience in one of the proposed host institutions in Italy. The duration of the training placement will depend on the type of trainee: unemployed young graduates (17 participants) will follow an intensive [...]</p>

LLP	Leonardo TOI	2006		Favaretto	INNOSKILLS - Innovation Skills for SMEs	<p>InnoSkills project proposal means to tackle the lack of ability in acquiring innovation management techniques of Italian SMEs Middle Management professional profiles, and specifically in Veneto Region. In doing so, InnoSkills proposal means to take advantage of experiences of SMEs in Germany, Austria, Portugal and Czech Republic. The project wants to increase levels of competitiveness in SMEs rising their employees skills, considering such an industrial organisation as the most relevant for the economic model of the above Countries. With this aim, the project intends to localise, upgrade and transfer pre-existing learning materials (i. e. InnoSupport guide) suitable to transfer and improve innovation management techniques targeting groups of professionals, i.e. trainers, students, SMEs advisors and (...)</p>
LLP	Partnership	2013	XXXIV	Lucibello	Net in Net	<p>The main idea of the project is to develop constructive discussion among partners in order to outline a proposal for a cognitive process on transnational business networks.</p> <p>Starting from critical factors and strengths of the phenomenon in each country, partners will share examples of collaborative strategies as well as experiences and will have the opportunity to enrich their knowledge and gain new insights, through the mechanisms of mutual learning, transfer of innovation and exchange of good practices. By virtue of the active involvement of all participants and stakeholders, an experimental methodology of training plan, with particular accent to specific sectors (High Fashion, ICT and Industry) will be developed along with the participation of a transnational sample group of SMEs professionals. In particular, the project plans to define a proposal for a cognitive process aimed at the preparation of the "Facilitator of transnational networks", i.e. the specialist in charge of promoting and strengthening international relationships between companies and whose expertise may contribute to increase the number and the performance of transnational business networks in EU. The consortium is made up of</p>

Youth	Youth	2011	XXXII	Testa	«Fratelli di una nuova Italia: viaggio tra le G2 a Milazzo»	The project «Fratelli di una nuova Italia: viaggio tra le G2 a Milazzo» («Brothers of a new Italy: a travel among the second generation immigrants in Milazzo»), aims to create a “reflection-andworking- group” in the reality of a little town in the south of Italy. It will involve about 20 young people who are sons of immigrants (“second generation immigrants” - G2) and sons of Italians, who have in common their place of birth (Italy) or the fact that they lived in Italy for most of their socialization process. For the length of six months we will play an active role in the process of empowerment on our identity-awareness of (...)
Youth	Youth	2012	XXXIII	Bianchini	A + +	<p>L'obiettivo generale è quello di far capire ai beneficiari del progetto come possano risparmiare nei consumi domestici e di aiutarli a mettere in pratica le azioni individuate.</p> <p>Ciascun membro del gruppo sarà il referente interno per singole unità o sotto-unità di lavoro del progetto.</p> <p>Il capogruppo fa da coordinatore per le varie azioni del progetto, controllando il loro corretto svolgimento ed evolversi.</p> <p>Inoltre, supporterà un giovane eco-manager nella preparazione degli incontri previsti (in buona parte supportati da esperti dei vari settori affrontati).</p> <p>Il capogruppo valuterà anche l'opportunità di avviare un'attività (no profit, cooperativa sociale) nel campo dell'efficienza energetica per il settore residenziale, legata alla promozione di dispositivi per il risparmio nei consumi, di [...]</p>

Youth	Youth	2012	XXXIII	Centomo	Y-Mocracy - Democracy for Youth	<p>Y-Mocracy is a project strongly promoted by Studio Progetto Società Cooperativa Sociale (lead applicant - Italy) and LDA Osijek (Local Democracy Agency - Croatia). They have involved public bodies (Municipality of Valdagno – Italy; Province of Vicenza – Italy; Youth Council of the City of Osijek – Croatia) to discuss about the participation of young people in democratic life, to find problems and difficulties they have in taking part in the democratic process from the local to the international level. Public bodies will send some participants (as well as NGOs) and some experts that will contribute to the discussion. ALDA (Association of Local Democracy Agencies, a non governmental organization dedicated to the promotion of good governance and citizens participation) will act as an external body in Y-Mocracy (not as partner) supporting the project with its capability in democratic participation and disseminating in its network experiences and results of Y-Mocracy. The duration of the project is calculated in 9 months. (...)</p>
Youth	Youth	2012	XXXIII	Crosera Gazzola	Art emancipating mind in the society	<p>Disabled people are still much barred from society and they rarely participate to the socio-cultural life. Especially young disabled people find difficulty in seeking their own dimension, running the risk of remaining "outsiders". The methods to get some benefit from this kind of condition are still missing. One way to fight against disabled people isolation and promote their active role in the society can be the steady relationship among heterogeneous groups who communicate through art as an instrument to make evident their own identity and promote social inclusion. ArtEMIS aims overall to increase interaction between young disabled people and normally endowed young artists and to promote artistic skills in disabled people with non formal learning through art as therapy and tool of social dialogue. The project intends to improve communication level for disabled people and their quality of life, to promote tolerance among young people, and to strengthen young artists' entrepreneurship, their professional skills and transversal competencies. In addition, the project wants to give visibility to young people attitudes, in order to facilitate their access in the labour market, creating job opportunities also for disadvantaged groups.</p> <p>The project "Art Emancipates Mind In the Society" (ArtEMIS) takes place in [...]</p>

Youth	Youth	2012	XXXIII	Lozzi	Young4Change	<p>The Project "Young4Change" intends to foster the development of new forms of active citizenship by involving young people in activities aimed at sensitizing other youngs and citizens on the issues of the climate change and the protection of the environment. One of the objectives of the Project is to create a transnational network able to act in the local community by actions aimed at raising awareness among young people. Among the specific objectives we can surely number the active involvement of local bodies (the Province of Pescara and the Municipality of Plonsk ) and the exchange of best practices through the non-formal education method. The activities foreseen are the following:</p> <p>1. A preparatory meeting in order to [...]</p>
Youth	Youth	2012	XXXIII	Sartor	Imagine Common Grounds	<p>IMMAGINE COMMON GROUNDS is a itinerary youth exchange project which will involve 12 young Italians and 12 young Croatians in an experience of mutual acquaintance through the observation of the landscape, as common identity element between the two cultures.</p> <p>The main theme of the project is the education for European citizenship through a deeper understanding of the creative tools of inquiry, knowledge and communication.</p> <p>The project wants to offer to its Participants an experience of open confrontation between two different cultures living in similar landscapes.
